Kit Installation

ENTER PIN CODE

The pin code can be found in the box of the kit.

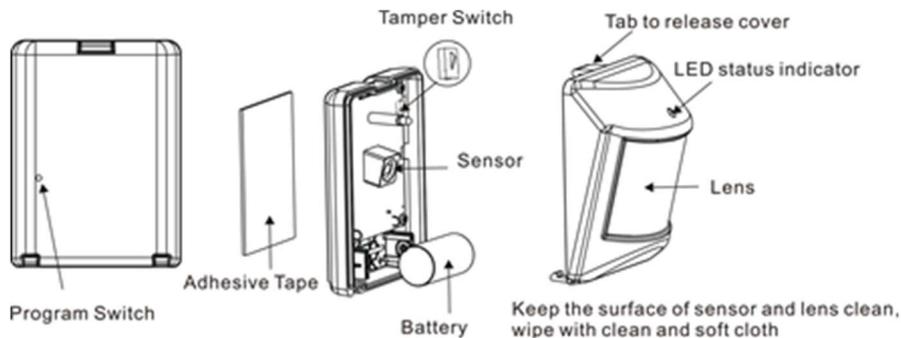

Type	Device	Serial number	Installed
	Gateway	1404ac1000103	✓
	Q-Plug	1498944805	Install
	Motion Sensor	4	Install
	Door Sensor	3	Install

Example 1: Install Motion Sensor

The first step in setting up the Motion Sensor open the box that got Motion Sensor –PIR printed on it.

Take out all components of the box and place them in front of you

Insert batteries and Close the back cover.

Soon after the batteries were inserted the component will be recognized

Click Next to continue the installation wizard.

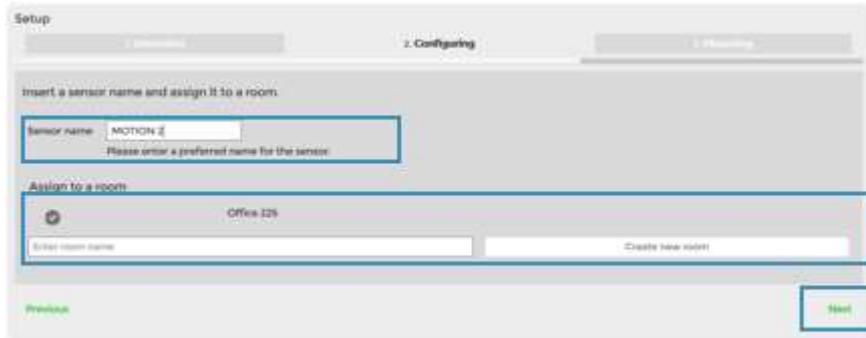

Note! If the sensor is not recognized within two minutes go back to installation page and try again.

At this step, the system will ask you to give a name to the Sensor.

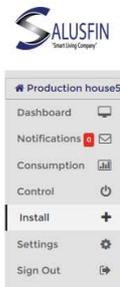

You also need to assign it to a room or create a new room.

Click “Next” to proceed.

Motion Sensor is now successfully installed.

You can verify Completed installation if there is a ✓ sign for Motion Sensor

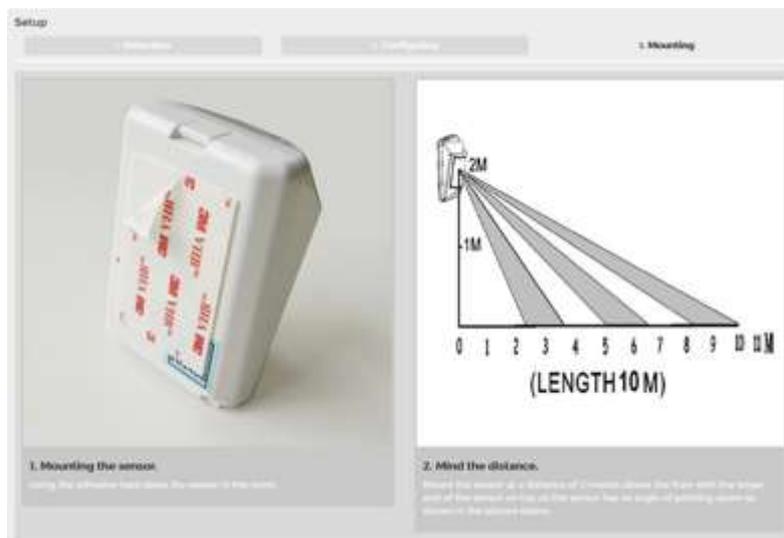

Kit Installation

ENTER PIN CODE

The pin code can be found in the box of the kit.

Type	Device	Serial number	Installed
	Gateway	1404ac1000103	✓
	Q-Plug	1498944805	<input type="button" value="Install"/>
	Motion Sensor	4	✓
